

Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Violence and aggression: the short-term management of violent and physically threatening behaviour in mental health, health and community settings.

2 List of Modelling Questions

Clinical questions by scope area	Does rapid tranquillisation used for the short-term management of violent and aggressive behaviour by mental health service users in health and community care settings produce benefits that outweigh possible harms when compared to an alternative management strategy?
Population	Mental health service users experiencing violent and aggressive behaviour episode
Interventions considered for inclusion	Lorazepam (4 mg), Aripiprazole (20 mg), Haloperidol (10 mg), Lorazepam (2 mg) and haloperidol (10 mg), Haloperidol (10 mg) and Promethazine (25 mg)
Type of analysis	Cost analysis
