History of harmful or hazardous drinking with deranged liver function
Conduct a full liver screen to exclude alternative causes of liver disease
Confirm diagnosis of alcohol-related liver disease / alcohol-related hepatitis by specialist
No clinical suspicion of alcohol-related hepatitis
Clinical suspicion of alcohol-related hepatitis
Provide enteral nutrition
mDF ≤ 32
mDF ≥ 32
Confirm diagnosis of alcohol-related hepatitis with a liver biopsy. Take into account the small but definite risks of morbidity and mortality when deciding on the utility of liver biopsy to make this diagnosis.
Treat with corticosteroids
