Hull York Medical School supported by a grant from Marie Curie has produced an [assessment tool](#) that supports the recommendations relating to best supportive care, review, follow-up and palliative care in the NICE guideline on [idiopathic pulmonary fibrosis](#). It also supports the statements about palliative care, oxygen, pulmonary rehabilitation and nurse access in the NICE quality standard for [idiopathic pulmonary fibrosis](#).

Endorsed resources are complementary information that may be of interest to you from sources outside of NICE. This resource has been developed by [Hull York Medical School](#) and is not maintained by NICE. NICE has not made any judgement about the quality and usability of the resource. In the event of any issues or errors, please contact [Hull York Medical School](#) in the first instance.
