Review of NICE Technology Appraisal Guidance No. 279; Percutaneous vertebroplasty and percutaneous balloon kyphoplasty for the treatment of osteoporotic vertebral fractures

Decision to move the existing guidance to the 'static list' – January 2016

In November 2015 the Institute proposed that TA279 should be transferred to the 'static guidance' list.

After consideration of all of the comments received during the Review Consultation, the Technology Appraisals programme has decided to proceed with this proposal.

TA279 will consequently move to the 'static guidance' list. Topics on the static list can be considered for review if any new evidence becomes available that is likely to lead to a change in the existing recommendations.
