**REF: Review of NICE Technology Appraisal Guidance No 78; fluid filled thermal balloon and microwave endometrial ablation for menstrual bleeding (TA78). Proposal to defer the review.**

Dear **XXXX**,

On behalf of Cytoc UK Ltd, I would like to inform you that we do not believe there is any additional evidence which would suggest that a review of NICE Technology Appraisal Guidance No 78; fluid filled thermal balloon and microwave endometrial ablation for menstrual bleeding would be beneficial.

In consideration of the recently published NICE CG44 guidance on Heavy Menstrual Bleeding we support the NICE Committee in its proposal to postpone the review of TA78 as we understand this supersedes all other existing guidance.

Should you wish to review any new peer-reviewed publication regarding the NovaSure<sup>®</sup> Impedance Controlled Endometrial Ablation System all relevant studies are accessible through publicly available data sources or from the company, on request.

Kind Regards,
