

Proposed library of topics

Key:

Topics in *italic* script = already referred to NICE for Quality Standard development

Topics in black script followed by an asterisk (*) = topics provisionally referred to NICE to allow assessment of suitability for Quality Standard development

Topics in black script = proposed additional topics

Category	Title
Cardiovascular	<p><i>Stroke</i></p> <p><i>Thromboembolic diseases (including pulmonary embolism)</i></p> <p><i>Acute coronary syndromes (including myocardial infarction)</i></p> <p><i>Chronic heart failure</i></p> <p><i>Stable angina</i></p> <p>Acute heart failure</p> <p>Atrial fibrillation</p> <p>Hypertension</p> <p>Secondary care management of malignant hypertension</p> <p>Lipid modification</p> <p>Secondary prevention of myocardial infarction and cardiac rehabilitation</p> <p>Familial hypercholesterolaemia</p> <p>Risk assessment of modifiable cardiovascular risk factors</p> <p>Peripheral vascular disease</p> <p>Varicose veins</p> <p>Abdominal aortic aneurysm</p>
Gastrointestinal	<p><i>Gastroesophageal reflux disease</i></p> <p><i>Ulcerative colitis</i></p> <p>Cholelithiasis & cholecystitis*</p> <p>Diverticular disease*</p> <p>Acute upper GI bleeding</p> <p>Crohn's disease</p> <p>Irritable bowel syndrome</p> <p>Coeliac disease</p> <p>Liver disease (non-alcoholic)</p> <p>Cirrhosis</p> <p>Pancreatitis (including acute pancreatitis)</p> <p>Hernia (including femoral and inguinal)</p>

Category	Title
Respiratory	<p><i>Chronic obstructive pulmonary disease</i> <i>Asthma (including children)</i> Pneumonia (including community acquired pneumonia) Idiopathic pulmonary fibrosis Sleep disordered breathing</p>
Mental health	<p><i>Depression (including with a chronic physical health problem)</i> <i>Bipolar disorder (adults)</i> <i>Bipolar disorder (children and young people)</i> <i>Schizophrenia</i> <i>Alcohol dependence and harmful alcohol use</i> <i>Drug use disorders</i> <i>Dementia</i> Anxiety Attention deficit hyperactivity disorder Depression (children and young people) Self-harm (adults) Eating disorders (including children) Personality disorders (borderline and antisocial) Autism (adults) Autism (children and young people) Conduct disorders (children and young people) Self harm (vulnerable groups, children and young people)</p>
Neurological	<p><i>Epilepsy (adults)</i> <i>Epilepsy (children)</i> <i>Headaches/migraine (young people and adults)</i> Multiple sclerosis Parkinson's disease Faecal incontinence Delirium Management of transient loss of consciousness in adults Motor neurone disease Neurological problems (relatively uncommon neurological problems e.g. muscular dystrophy)</p>
Endocrine, nutritional and metabolic	<p><i>Type 1 diabetes</i> <i>Type 2 diabetes (including foot care)</i> <i>Diabetes in children and young people</i> <i>Nutrition support in adults</i> Obesity (adults) Thyroid disease Adrenal dysfunction</p>

Category	Title
Maternity and reproductive	<i>Antenatal care</i> <i>Intrapartum care</i> <i>Postnatal care</i> Induction of labour Hypertension in pregnancy Diabetes in pregnancy Caesarean section Pain and bleeding in early pregnancy Multiple pregnancy Premature labour Antenatal and postnatal mental health Fertility Heavy menstrual bleeding Menopause Endometriosis Contraceptive services (including emergency contraception)
Neonates and children	<i>Specialist neonatal care</i> <i>Bacterial meningitis and meningococcal septicaemia</i> Bronchiolitis* Premature birth Constipation (children and young people) Neonatal jaundice Nocturnal enuresis Antibiotics for neonatal infection Anaphylaxis Failure to thrive Cystic fibrosis Cerebral palsy Developmental follow-up of pre-term babies Blood transfusion in neonatology Parenteral nutrition in neonates Childhood obesity Urinary tract infection (children) Feverish illness in childhood Gastroesophageal reflux (children) (NB. A number of topics on children and young people are included in other categories)
Genitourinary	<i>Chronic kidney disease</i> Urinary tract infections* Renal replacement therapy services Renal stones Urinary incontinence (women) Lower urinary tract symptoms (men) Acute kidney injury (non-traumatic)

Category	Title
Cancers and tumours	<i>Breast cancer</i> <i>Colorectal cancer</i> <i>Lung cancer</i> <i>Ovarian cancer</i> <i>Prostate cancer</i> Chemotherapy* Haematological cancers Head and neck Sarcoma Skin cancer (including melanoma) Children and young people with cancer Metastatic spinal cord compression Referral for suspected cancer Radiotherapy services Bladder Cancer
Blood disorders	Sickle cell crisis Transfusion
Musculoskeletal	<i>Osteoarthritis</i> Rheumatoid arthritis Low back pain Seronegative arthropathies Elective joint replacement (hip, knee and shoulder)
Eye/vision	<i>Glaucoma</i> Macular degeneration Cataracts
Hearing	Hearing loss (adult onset) Tinnitus
Skin	<i>Pressure ulcers</i> Eczema in children Psoriasis Acne
Infectious disease	<i>Hepatitis B</i> Tuberculosis Infection control Surgical site infection and sepsis
Trauma and injuries	<i>Head injury</i> <i>Hip fractures</i> Fractures (excluding head and hip)* Major trauma* Resuscitation following major trauma and major blood loss Complex fractures (including compound fractures)

Category	Title
Other/cross-cutting	<i>End of life care</i> <i>Falls</i> <i>Patient experience (generic)</i> <i>Patient experience in mental health</i> <i>Intravenous fluid therapy in hospitalised adult patients</i> <i>Safe prescribing</i> Urgent & emergency care* Perioperative care* Long-term conditions, people with comorbidities, complex needs* Pain management (young people and adults)* Nutrition in hospital, including young people Managing symptoms with an uncertain cause Medicines adherence Diagnosis and management of drug allergy Challenging behaviour in learning disability Mental health problems with learning disability End of life care for infants, children and young people Intravenous fluids in children
Service delivery topics	Provision of termination of pregnancy services Trauma services Acute medical admissions in the first 48 hours Managing the transition from children's to adult services Consultant review within 12 hours of admission Out of hours care Readmissions 7 day working Readmission to ICU within 48hrs
