

AAC Rapid Uptake Products

- **HeartFlow Analysis for estimating fractional flow reserve from coronary CT angiography [HeartFlow Inc]** – A non-invasive personalised cardiac test that reduces the need for unnecessary procedures
- **Placental growth factor (PlGF) based testing for suspected pre-eclampsia** (Elecsys immunoassay sFlt-1/PLGF ratio [Roche Diagnostics]) – Tests for early diagnosis of pre-eclampsia in pregnant women, which if unmonitored, can cause serious complications for mother and baby.
- **PCSK9 inhibitors for treatment of primary hypercholesterolaemia and mixed dyslipidaemia** (alirocumab [Sanofi]; evolocumab [Amgen]) – Cost-effective drugs that significantly lower cholesterol.
- **High sensitivity troponin tests for early rule out of myocardial infarction** (Elecsys Troponin T high-sensitive [Roche Diagnostics]; ARCHITECT STAT High Sensitive Troponin-I [Abbott Diagnostics]) – Diagnostic tests that detect whether or not a patient is at risk or previously had a heart attack.
- **Quantitative faecal immunochemical tests for colorectal cancer** (OC Sensor [MAST Diagnostics]; HM-JACKarc [Alpha Laboratories]; FOB Gold [Sysmex]) – Diagnostic tests that reduce referrals for patients with suspected colorectal cancer.
- **Cladribine (Brand name: Mavenclad [Merck]) for treating highly active relapsing-remitting multiple sclerosis in adults** – A drug for multiple sclerosis with a novel mode of action, high efficacy and a low treatment and monitoring burden
- **Urolift for lower urinary tract symptoms of benign prostatic hyperplasia [Teleflex]** – A cost-saving device that relieves painful urinary tract symptoms in men.
