

NATIONAL INSTITUTE FOR HEALTH AND CARE EXCELLENCE

Guideline scope

Mental wellbeing at work

This guideline will update and replace the NICE guideline on [mental wellbeing at work](#) (NICE guideline PH22; 2009).

NICE worked with Public Health England to develop this scope.

The guideline will be developed using the methods and processes outlined in [developing NICE guidelines: the manual](#).

This guideline may also be used to update the NICE quality standard for [healthy workplaces: improving employee mental and physical health and wellbeing](#).

1 Why the update is needed

New evidence that could affect recommendations was identified through the surveillance process. Topic experts, including those who helped to develop the existing guideline, advised NICE on whether areas should be updated or new areas. Full details are set out in the [surveillance review decision](#).

Key facts and figures

The proportion of UK employees who are part-time, temporary, agency staff, on zero hours contracts or self-employed has increased since PH22 was published in 2009.

The Stevenson/Farmer review [Thriving at work](#) estimates that 15% of UK workers have an existing mental health condition.

Poor mental wellbeing costs employers in the UK an estimated £33 billion to £42 billion annually through presenteeism, sickness absence and staff turnover ([Mental health and employers: the case for investment Deloitte](#)).

1 The total annual cost of poor mental wellbeing to the Government, including
2 NHS costs, benefit provision and tax revenue losses, is between £24 billion
3 and £27 billion. Lost output costs the economy between £74 billion and
4 £99 billion (Thriving at Work).

5 **Current practice**

6 Workplace policies and activities to promote and protect employee mental
7 health and wellbeing vary widely.

8 The Department of Work and Pensions reports that most employers have
9 basic health and wellbeing policies, including at least one covering either
10 flexible working, sick pay or injury training ([Health and wellbeing at work: a
11 survey of employees, 2014](#)). Larger and public sector organisations are more
12 likely to offer at least one of the following: health-screening, occupational
13 health services, independent counselling or stress management.

14 Many employers know the value of positive mental wellbeing but don't know
15 how to promote it. For example, the 2017 Business in the Community report
16 [Mental Health at Work](#) found that only 24% of managers have received
17 training on mental wellbeing at work.

18 At the same time, employees with poor mental wellbeing are less likely to
19 disclose it to an employer. If they do disclose it they are also less likely to feel
20 supported than if they had a physical condition.

21 **Policy, legislation and guidance**

22 Several policies and guidance have been published since 2009 that focus on
23 promoting positive mental wellbeing in the workplace. For example in 2016,
24 Public Health England and Business in the Community published a [mental
25 health toolkit](#) offering practical steps employers can take to develop a
26 workplace culture that promotes mental wellbeing. In 2017, the Thriving at
27 work review recommended core mental health standards for the workplace.

28 In addition, the [Equality Act \(2010\)](#) requires employers to make reasonable
29 adjustments for people with disabilities, including recurring or long-lasting
30 mental ill health.

1 All the above describe what organisations should do. But this guideline will
2 provide an evidence-based framework through which organisations can
3 holistically promote good mental wellbeing and support those with poor mental
4 wellbeing at work.

5 **2 Who the guideline is for**

6 This guideline is for:

- 7 • employers
- 8 • employers' representatives, including:
 - 9 – board members and senior leaders
 - 10 – managers
 - 11 – human resource professionals
 - 12 – occupational health professionals
 - 13 – professionals contracted to provide employee support services.
- 14 • employees, their workplace representatives and professional membership
15 organisations or professional associations
- 16 • local authorities and commissioners of primary care services
- 17 • employment support services
- 18 • GPs and other health professionals.

19 It may also be relevant for:

- 20 • employment advisers
- 21 • membership organisations for employers and businesses
- 22 • trade unions
- 23 • advocacy and voluntary groups
- 24 • researchers and policy makers.

25 NICE guidelines cover health and care in England. Decisions on how they
26 apply in other UK countries are made by ministers in the [Welsh Government](#),
27 [Scottish Government](#), and [Northern Ireland Executive](#).

1 ***Equality considerations***

2 NICE has carried out [an equality impact assessment](#) during scoping. The
3 assessment:

- 4 • lists equality issues identified, and how they have been addressed
- 5 • explains why any groups are excluded from the scope.

6 If evidence is available the guideline will look at inequalities relating to:

- 7 • gender, age, sexuality, disability and other protected characteristics
8 defined by the Equality Act 2010
- 9 • size of employer, location, nature of employment (such as part-time
10 working, remote working and zero-hours contracts) and socioeconomic
11 status.

12 **3 What the guideline will cover**

13 **3.1 Who is the focus?**

14 **Groups that will be covered**

- 15 • Everyone aged 16 or older in full- or part-time employment, including
16 people on permanent, training, temporary or zero hours contracts, those
17 who are self-employed and volunteers.
- 18 • Employers.

19 Special consideration will be given to:

- 20 • Employees with poor mental wellbeing.
- 21 • Occupational groups with a higher prevalence of work-related poor mental
22 wellbeing.
- 23 • Employees with long-term health conditions that may affect their mental
24 wellbeing at work.

25 **Groups that will not be covered**

- 26 • People who are not employed
- 27 • Prisoners who engage in work activities.

- 1 • Inpatients in mental health institutions who engage in work activities.
- 2 • Military personnel.

3 **3.2 Settings**

4 **Settings that will be covered**

5 All workplaces in the public, private and voluntary sectors or any other setting
6 where an employer is involved in promoting mental wellbeing. This
7 involvement may include the initiation, design, delivery, management, funding
8 of, or signposting to, an intervention including those that are delivered online
9 or digitally.

10 **3.3 Activities, services or aspects of care**

11 **Key areas that will be covered**

12 We will look at evidence in the areas below when developing the guideline,
13 but it may not be possible to make recommendations in all the areas.

14 1 Universal approaches at organisational level for all employees, for
15 example:

- 16 – changes to the physical workplace
- 17 – implementation of relevant policies
- 18 – engaging staff in decision making
- 19 – reducing hierarchies within and across staff categories
- 20 – training to improve awareness and recognition of mental wellbeing at
21 work and how to support others
- 22 – encouraging regular discussion among managers and employees
23 about mental wellbeing
- 24 – assessing employee mental wellbeing needs
- 25 – assessing periods of high risk for example, during inductions

26 2 Universal approaches at organisational level for managers, for example:

- 27 – training to improve manager awareness about the stigma around
28 mental health issues
- 29 – training to help managers to communicate about mental wellbeing
- 30 – training to help managers to promote positive wellbeing

- 1 – training to improve skills and understanding of inclusion, equality and
2 diversity issues and differences in brain function (neurodiversity)
- 3 – training to improve skills and confidence to recognise and respond to
4 employees experiencing or who they identify being at risk of poor
5 mental wellbeing
- 6 – training to improve awareness of what support is available and how to
7 access it
- 8 3 Targeted approaches at organisational level for employees who are
9 experiencing or who are identified as being at risk of poor mental
10 wellbeing, for example:
 - 11 – peer support initiatives
 - 12 – encouraging people to seek support at work.
- 13 4 Universal approaches at individual level for all employees, for example
14 encouraging uptake of health risk reduction and promotion programmes
15 such as:
 - 16 – mindfulness training
 - 17 – positive psychology sessions
 - 18 – stress management
 - 19 – burnout prevention
 - 20 – training in resilience, coping skills and mental health literacy
 - 21 – meditation and yoga.
- 22 5 Targeted interventions at individual level for employees who are
23 experiencing or who are identified as being at risk of poor mental
24 wellbeing, for example:
 - 25 – stress management and burnout prevention,
 - 26 – workplace adjustments
 - 27 – signposting to health services or voluntary sector providers for
28 advocacy or representation, support or treatment
 - 29 – referral through occupational health services for support such as
30 counselling.
- 31 6 Successful implementation and delivery of workplace mental wellbeing
32 programmes

1 **Areas that will not be covered**

- 2 1 Interventions that are part of a return-to-work programme or aimed at
3 employees on a long-term sickness absence. These are covered by
4 NICE guidance on long-term sickness absence.
- 5 2 Workplace interventions that do not aim to promote mental wellbeing.
- 6 3 Interventions delivered outside work without workplace involvement or
7 collaboration.
- 8 4 Interventions to improve line manager competencies. These are covered
9 by the NICE guideline on workplace health: management practices.

10 **Related NICE guidance**

3 expected January 2020)
- 4 • [Chronic pain: assessment and management](#). NICE guideline (Publication
5 expected August 2020)

6 **3.4 *Economic aspects***

7 We will take economic aspects into account when making recommendations.
8 We will develop an economic plan that states for each review question (or key
9 area in the scope) whether economic considerations are relevant, and if so
10 whether this is an area that should be prioritised for economic modelling and
11 analysis. We will review the economic evidence and carry out economic
12 analyses, using one or more perspectives, as appropriate.

13 **3.5 *Key issues and draft questions***

14 While writing this scope, we have identified the following key issues and draft
15 questions related to them:

- 16 1 Universal approaches at organisational level for all employees
- 17 1.1 What universal, organisational-level interventions, programmes,
18 policies or strategies are effective and cost-effective at:
- 19 – Improving mental wellbeing?
20 – Preventing poor mental wellbeing?
- 21 1.2 What interventions or strategies effectively and cost-effectively help
22 employers and peers to recognise and engage employees who may
23 require support for their mental wellbeing, or to identify periods of high
24 risk within an organisation?
- 25 1.3 Are these organisational-level interventions, programmes, strategies
26 or policies acceptable to:
- 27 – Employees receiving them?
28 – Employers?
29 – Those delivering them?
- 30 2 Universal approaches at organisational level for managers

- 1 2.1 What approaches to help managers to understand, promote and
2 support mental wellbeing are effective and cost-effective?
- 3 2.2 What approaches are effective and cost-effective to help managers
4 to improve their knowledge and skills in recognising employees who
5 experience or are at risk of poor mental wellbeing?
- 6 2.3 What approaches are effective and cost-effective to help managers
7 to improve their knowledge and skills in responding to mental wellbeing
8 issues?
- 9 2.4 Are approaches to training managers in employee mental wellbeing
10 acceptable to:
- 11 – Managers receiving them?
 - 12 – Employees who will interact with managers?
 - 13 – Employers?
 - 14 – Those delivering them?
- 15 3 Targeted approaches at organisational level for employees who are
16 experiencing or who are identified as being at risk of poor mental
17 wellbeing
- 18 3.1 What organisational-level approaches, programmes, strategies or
19 policies targeted to employees who experience or who are identified as
20 being at risk of experiencing poor mental wellbeing at work are effective
21 and cost-effective at:
- 22 – Improving mental wellbeing?
 - 23 – Preventing poor mental wellbeing?
- 24 3.2 Are these organisational-level interventions, programmes, strategies
25 or policies acceptable to:
- 26 – Employees receiving them?
 - 27 – Employers?
 - 28 – Those delivering them?
- 29 4 Universal approaches at individual level available for all employees
- 30 4.1 What universal, individual-level interventions or programmes are
31 effective and cost effective at
- 32 – Improving mental wellbeing?
 - 33 – Preventing poor mental wellbeing?

1 4.2 Are universal individual-level interventions or programmes
2 acceptable to:

- 3 – Employees receiving them?
- 4 – Employers?
- 5 – Those delivering them?

6 5 Targeted approaches at individual level for employees who are
7 experiencing or who are identified as being at risk of poor mental
8 wellbeing

9 5.1 What individual-level interventions targeted to employees who
10 experience or are identified as being at risk of poor mental wellbeing at
11 work are cost effective and:

- 12 – Improve mental wellbeing?
- 13 – Prevent poor mental wellbeing?

14 5.2 Are targeted individual-level interventions or programmes acceptable
15 to:

- 16 – Employees receiving them?
- 17 – Employers?
- 18 – Those delivering them?

19 6 Successful implementation and delivery of workplace mental wellbeing
20 programmes

21 6.1 What are the barriers and facilitators to, and key aspects of
22 (including systems and processes), the successful implementation or
23 delivery of mental wellbeing interventions, programmes, policies or
24 strategies at work?

25 The key issues and draft questions will be used to develop more detailed
26 review questions, which guide the systematic review of the literature.

27 **3.6 Main outcomes**

28 The main outcomes that may be considered when searching for and
29 assessing the evidence are:

- 30 1 employee mental wellbeing outcomes, for example:
- 31 – mental wellbeing

- 1 – specific conditions such as stress, burnout, depression, anxiety,
 2 fatigue and insomnia
- 3 – work engagement and motivation
- 4 – job satisfaction
- 5 – work–life balance
- 6 – emotional resilience
- 7 2 employment-related outcomes, for example:
- 8 – engagement
- 9 – absenteeism
- 10 – presenteeism
- 11 – productivity
- 12 3 organisation-level outcomes, for example:
- 13 – implementation of mental wellbeing policies
- 14 – referral, access to, and uptake of, support services
- 15 – methods and levels of employee consultation and participation
- 16 – employee retention
- 17 – organisation productivity
- 18 – discrimination, stigma and bullying
- 19 – patient and public safety
- 20 4 manager outcomes, for example:
- 21 – awareness and attitudes about employee mental wellbeing
- 22 – skills and confidence in responding to mental wellbeing issues
- 23 5 cost effectiveness
- 24 6 cost impact
- 25 7 quality of life
- 26 8 unintended consequences, for example increasing stigma if an
 27 educational approach focusses on mental wellbeing.

28 The main outcomes that may be considered when searching for and
 29 assessing the evidence for acceptability of interventions are:

- 30 • satisfaction
- 31 • adherence.

1 The main outcomes that may be considered when searching for and
2 assessing the evidence for barriers and facilitators to implementing
3 interventions are:

- 4 • physical environment (including time)
- 5 • staffing
- 6 • size and type of organisation
- 7 • access to support services
- 8 • attitudes.

9 **4 NICE quality standards and NICE Pathways**

10 **4.1 NICE quality standards**

11 **NICE quality standards that may need to be revised or updated when**
12 **this guideline is published**

- 13 • [Healthy workplaces: improving employee mental and physical health and](#)
14 [wellbeing](#) (2017) NICE quality standard QS147.

15 **4.2 NICE Pathways**

16 When this guideline is published, we will update the NICE Pathway on
17 [promoting mental wellbeing at work](#), which brings together everything we have
18 said on this topic in an interactive flowchart.

19 **5 Further information**

This is the draft scope for consultation with registered stakeholders. The
consultation dates are 12 August to 9 September 2019.

The guideline is expected to be published in August 2021.

You can follow progress of the [guideline](#).

Our website has information about how [NICE guidelines](#) are developed.
