## NICE quality standards

### Equality impact assessment

#### End of life care for infants, children and young adults

The impact on equality has been assessed during quality standard development according to the principles of the NICE equality policy.

#### 1. TOPIC ENGAGEMENT STAGE

1.1 Have any potential equality issues been identified during this stage of the development process? How have they been addressed?
--

No specific equality issues have been identified at this stage.
---

1.2 Have any population groups, treatments or settings been excluded from coverage by the quality standard at this stage in the process. Are these exclusions justified – that is, are the reasons legitimate and the exclusion proportionate?
--

The quality standard will cover end of life care for infants, children and young people aged up to 18 years who have a life-limiting condition. It will also cover providing support to family members and carers.
--

End of life care for adults 18 years and over is addressed by separate quality standard.

## 2. PRE-CONSULTATION STAGE

2.1 Have any potential equality issues been identified during the development of the quality standard (including those identified during the topic engagement process)? How have they been addressed?

The QSAC noted comments from the stakeholder engagement exercise on limited access to specific education for staff on how to support parents and carers of children and young people with a life-limiting conditions who have a learning disability that means they have difficulties understanding information given to them about bereavement support. Statements 3 and 5 aim to ensure all children and young people and their parents and carers receive the emotional and psychological support that they require according to their needs.

2.2 Have any changes to the scope of the quality standard been made as a result of topic engagement to highlight potential equality issues?

No changes have been made to the scope of the quality standard at this stage.

2.3 Do the draft quality statements make it more difficult in practice for a specific group to access services compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

No.

2.4 Is there potential for the draft quality statements to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

No.

2.5 Are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access to services identified in questions 2.1, 2.2 or 2.3, or otherwise fulfil NICE's obligation to advance equality?

No.
