Recommendation for Guidance Executive

Clinical guideline

CG130: Management of hyperglycaemia in acute coronary syndromes

Publication date

October 2011

Surveillance decision for GE

July 2014

Key findings

			Potential impact on guidance	
			Yes	No
Evidence from Evidence Update				✓
Anti-discrimination and equalities considerations				✓
No update	Rapid update	Standard update	Transfer to static list	Change review cycle
✓				

Surveillance proposal

Further to the publication of the Evidence Update on CG130: Management of hyperglycaemia in acute coronary syndromes where no impacts were identified, GE is asked to consider the proposal to not update the guideline at this time.

NATIONAL INSTITUTE FOR HEALTH AND CARE EXCELLENCE

Centre for Clinical Practice – Surveillance Programme

Surveillance review of CG130: Management of hyperglycaemia in acute coronary syndromes

Recommendation for Guidance Executive

Background information

Guideline issue date: 2011

2 year review: 2013

NCC: Internal Clinical Guidelines

Current two year surveillance review

1. The [Evidence Update](#) on CG130: Management of hyperglycaemia in acute coronary syndromes was used as the primary source of evidence for this surveillance decision (search dates: 1 July 2010 to 18 September 2012). A summary of the evidence is provided in the Evidence Update.
2. The Evidence Update indicates that there is currently insufficient new evidence to invalidate the existing guideline recommendations. Therefore the Surveillance Programme recommends no update at this time.

On-going Research

3. Not considered at 2 year review point.

Anti-discrimination and equalities considerations

4. None identified through the Evidence Update.

Implications for other NICE programmes

5. None identified through the Evidence Update.

Surveillance recommendation

6. GE is asked to consider the proposal to not update the guideline at this time. GE are asked to note that as a 2 year surveillance decision this 'no to update' proposal will not be consulted on.
