### GUIDELINES EQUALITY IMPACT ASSESSMENT FORM SCOPING

As outlined in the guidelines manual NICE has a duty to take reasonable action to avoid unlawful discrimination and promote equality of opportunities. The purpose of this form is to document that equalities issues have been considered in reaching the final scope for a clinical guideline.

Taking into account **each** of the equality characteristics below the form needs:

- To confirm that equality issues have been considered at **every stage** of the scoping (from drafting the key clinical issues, stakeholder involvement and wider consultation to the final scope)
- Where groups are excluded from the scope, to comment on any likely implications for NICE's duties under equality legislation
- To highlight planned action relevant to equalities.

This form is completed by the National Collaborating Centre (NCC) Director and the Guideline Development Group (GDG) Chair **for each guideline** and submitted with the final scope for sign off by the Chair of the Guidelines Review Panel (GRP) and the lead from the Centre for Clinical Practice.

## **GUIDELINES EQUALITY IMPACT ASSESSMENT FORM: SCOPING**

**Guideline title:** Psychosis and schizophrenia: recognition and management of psychosis and schizophrenia in children and young people

### **1. Have relevant equality issues been identified during scoping?**

Children, young people and adults with schizophrenia from black and minority ethnic (BME) backgrounds tend to present late to services. They are more frequently subject to compulsion and have less access to psychological therapies than their white counterparts. This will be tackled by looking for ways to improve access to, and engagement with mental health services specifically for this BME group of children and young people.

Children and young people with schizophrenia and a mild learning disability will also be considered as a separate sub group.

### **2. If there are exclusions listed in the scope (for example, populations, treatments or settings) are these justified?**

The scope will not cover adults of 18 years old or older. This is justified as this has been dealt with in detail by the guideline "Schizophrenia (update) in adults".

The scope will not cover children and young people with psychotic disorders other than psychosis and schizophrenia. Psychotic disorders include a broad definition of a number of non-affective, affective, and substance-induced psychotic disorders. Our remit is to review ONLY the recognition and management of psychosis and schizophrenia.

### **3. Have relevant bodies and stakeholders been consulted?**

The equalities issues raised in the scoping workshop have been considered in this draft of the scope and largely reflect the feedback received.
