

Economic Plan

This document identifies the areas prioritised for de Novo economic analysis. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline

1 Guideline

Fever in children

2 List of Modelling Questions

Insert a list of the clinical areas which have selected for de Novo modelling in the table below along with a brief description of the model using a 'PICO' format. Please include details of the type of analysis¹

#	Areas prioritised for health economic modelling
	Area 1 - PCT vs CRP
Population	Children 5 years and under with fever
Interventions included in analysis	Procalcitonin and C-reactive protein and
Type of analysis	CUA
	Area 2 Paracetamol and NSAIDs to reduce fever
Population	Children 5 years and under with fever
Interventions included in analysis	Paracetamol vs. placebo Ibuprofen vs. placebo Paracetamol and ibuprofen combined vs. placebo Paracetamol and ibuprofen alternating vs. placebo Paracetamol vs. ibuprofen Paracetamol vs. paracetamol and ibuprofen combined Paracetamol vs. paracetamol and ibuprofen alternating Ibuprofen vs. paracetamol and ibuprofen combined Ibuprofen vs. paracetamol and ibuprofen alternating paracetamol and ibuprofen combined vs. paracetamol and ibuprofen alternating
Type of analysis	CUA

¹This section should give details of the proposed areas economic analysis will be conducted including the type of analysis (CUA, CEA, CMA etc).
