

Economic Plan

This document identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

Myocardial infarction: secondary prevention in primary and secondary care for patients following a myocardial infarction (short: MI secondary prevention)

2 List of Modelling Questions

Clinical questions by scope area	Uptake and adherence to cardiac rehabilitation
Population	People who had had a recent MI
Interventions considered for inclusion	Usual care Automatic referral Cardiac rehabilitation liaison Automatic referral with a cardiac rehabilitation liaison Personalised goal setting Calls/Letters/Home visits Letters Phone calls Early initiation of cardiac rehabilitation (EI) EI followed by automatic referral EI followed by cardiac rehabilitation liaison EI followed by automatic referral with a cardiac rehabilitation liaison EI followed by personalised goal setting EI followed by Calls/Letters/Home visits EI followed by letters EI followed by phone calls
Type of analysis	CUA
