

Obesity

Identification, assessment and management of
overweight and obesity in children, young people and
adults

Update of CG43

Appendix K

November 2014

*Commissioned by the National Institute for
Health and Care Excellence*

Disclaimer

Healthcare professionals are expected to take NICE clinical guidelines fully into account when exercising their clinical judgement. However, the guidance does not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of each patient, in consultation with the patient and/or their guardian or carer.

Appendices

Appendix K: Excluded economic studies

K.1 Very-low-calorie diets (VLCD)

None

K.2 Bariatric surgery for people with type 2 diabetes

Reference	Reason for exclusion
Ackroyd 2006 ¹	This study was assessed as partially applicable with very serious limitations. In addition although the patients have type 2 diabetes it is unclear whether it is early on-set.
Alsemino 2009 ²	This study was assessed as partially applicable with very serious limitations. The study runs the same analysis as Ackroyd, however in non-UK countries.
Cremieux 2011 ³	This study was assessed as partially applicable with very serious limitations. In addition although the patients have type 2 diabetes it is unclear whether it is early on-set..
Finklestein 2011 ⁴	This study was assessed as not applicable with very serious limitations. More applicable evidence is available.
Ikramuddin 2009 ⁵	This study was assessed as not applicable as it is a US study on gastric bypass that uses clinical data derived from a non-published prospective cohort study. More applicable evidence is available for this comparison.
Keating 2009 ⁷	Keating 2009 ⁶ is an update of this analysis using a lifetime time horizon.
Mcewen 2010 ⁸	This study was assessed as not applicable as it is unclear whether the patient's type-2 diabetes is early onset.
Picot 2009 ⁹	Picot 2012 ¹⁰ is an update of this analysis.

K.3 Follow-up care packages after bariatric surgery

None.
