FH

4. Personal non-pecuniary interest:

Personal non-pecuniary interest
I act as an unpaid consultant for the company Tepnel which is developing a testing kit for common mutations in patients with FH.
I have a confidentiality disclosure agreement with a company Randox, who is developing a genetic testing kit for patients with coronary heart disease.

Based on modelling, I have published papers stating that cascade testing to identify relatives of FH patients is cost effective.
Based on data I have generated with others, I have published papers demonstrating the potential clinical utility of genetic testing in the identification and management of patients with FH.
Based on data collected in collaboration with others, I have published papers stating that DNA testing in the relatives of patients with FH is not associated with any significant psychological harm

Ian
