			I am in discussion with a joint academic and Industry (Apoplex) research project in the capacity of NE England and North Cumbria stroke research specialty group lead. The project may involve use of non invasive monitoring for 7 days post stroke to avoid unnecessary use of ILRs which may be expensive burden on the NHS. I have received no financial compensation for the project. In any case, the research project is outwith the scope of NICE work and addresses detection of PAF, ahead of use of ILRs.		06/11/2018		<i>Reviewed by Chair and AD, November 2018, declare and participate</i>
