Equality impact assessment – Guidance development

STA

**Aflibercept in combination with irinotecan and
fluorouracil-based therapy for treating metastatic
colorectal cancer that has progressed following prior
oxaliplatin-based chemotherapy**

The impact on equality has been assessed during this appraisal according to the principles of the NICE equality scheme.

Consultation

1. Have the potential equality issues identified during the scoping process been addressed by the Committee, and, if so, how?
N/A

2. Have any other potential equality issues been raised in the submissions, expert statements or academic report, and, if so, how has the Committee addressed these?
No.

3. Have any other potential equality issues been identified by the Committee, and, if so, how has the Committee addressed these?
No.

4. Do the preliminary recommendations make it more difficult in practice for a specific group to access the technology compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

No (afibercept was not recommended for metastatic colorectal cancer in the preliminary recommendations).

5. Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

No.

6. Are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 4 or 5, or otherwise fulfil NICE's obligations to promote equality?

N/A

7. Have the Committee's considerations of equality issues been described in the appraisal consultation document, and, if so, where?

The summary table states that no equality issues relevant to the Committee's preliminary recommendations were raised.

Approved by Associate Director (name): Elisabeth George

Final appraisal determination

(when an ACD issued)

1. Have any additional potential equality issues been raised during the consultation, and, if so, how has the Committee addressed these?

No.

2. If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access the technology compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

N/A (the recommendations have not changed after consultation).

3. If the recommendations have changed after consultation, is there potential for the recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

N/A

4. If the recommendations have changed after consultation, are there any recommendations or explanations that the Committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 2 and 3, or otherwise fulfil NICE's obligations to promote equality?

N/A

5. Have the Committee's considerations of equality issues been

Technology appraisals: Guidance development

Equality impact assessment for the single technology appraisal of aflibercept in combination with irinotecan and fluorouracil-based therapy for treating metastatic colorectal cancer that has progressed following prior oxaliplatin-based chemotherapy

Issue date: 25 02 2014

described in the final appraisal determination, and, if so, where?

The summary table states that no equality issues relevant to the Committee's recommendations were raised.
