

Economic plan

This plan identifies the areas prioritised for economic modelling. The final analysis may differ from those described below. The rationale for any differences will be explained in the guideline.

1 Guideline

CG81 Advanced breast cancer: diagnosis and treatment

2 List of modelling questions

Review questions by scope area	<p>2.1 What is the clinical and cost-effectiveness of PET-CT compared to CT for the detection and management of distant metastases in people with suspected metastatic breast cancer?</p> <p>&</p> <p>3.1 What is the clinical and cost-effectiveness of PET-CT for monitoring response to treatment and for detecting progression in people with metastatic breast cancer?</p>
Population	People with suspected advanced breast cancer
Interventions and comparators considered for inclusion	Diagnostic and monitoring strategies comprising of one or more of: <ul style="list-style-type: none"> • PET-CT • CECT
Perspective	NHS & PSS
Outcomes	<ul style="list-style-type: none"> • QALYs • Costs • Incremental cost-effectiveness
Type of analysis	CUA
Issues to note
