

Olipudase alfa for treating acid sphingomyelinase deficiency (Niemann–Pick disease) type AB and type B

Information for the public

Published: 2 April 2025

www.nice.org.uk

Olipudase alfa (Xenpozyme) is not normally available on the NHS for treating acid sphingomyelinase deficiency (ASMD, also called Niemann–Pick disease) in adults with type-AB or type-B ASMD. Your doctor should talk with you about other treatment options. If you are already taking it, you should be able to continue until you and your doctor decide when best to stop.

Information and support

[Niemann–Pick UK](#) (0191 415 0693) can give you advice and support.

You can also get support from your local [Healthwatch](#).
