

HTG131 - Fetal cystoscopy for the diagnosis and treatment of lower urinary outflow tract obstruction

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Diagnostic

R02.8 Other specified diagnostic endoscopic examination of fetus

Therapeutic

R01.8 Other specified therapeutic endoscopic operations on fetus

Y53.2 Approach to organ under ultrasonic control

Note: A code from **Y95.- Gestational age** must be assigned in a subsidiary position where this information is available.

Note: A site code can be added as appropriate

Note: If both diagnostic and therapeutic procedures are performed together, only the code for the therapeutic procedure is assigned.

Diagnosis or health condition:

ICD-10 code(s):

An ICD-10 code to classify the cause of the obstruction is assigned.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
