

HTG216 - Macular translocation with 360° retinotomy for wet age related macular degeneration

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Macular translocation with three hundred and sixty degree retinotomy
(865571000000106)

OPCS-4 code(s):

For the 1st stage of the procedure the following OPCS-4 codes are:

C83.2 Macular translocation three hundred and sixty degrees

C79.6 Internal tamponade of retina using liquid

Includes: Internal tamponade of retina using oil or heavy liquids

Y70.3 First stage of staged operations NOC

Z94.- Laterality of operation

2nd stage:

C86.8 Other specified other operations on eye

Y71.1 Subsequent stage of staged operations NOC

Z94.- Laterality of operation

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Exudative age-related macular degeneration (414173003)

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of the Health and Social Care Information Centre is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
