HTG229 – Laparoscopic hysterectomy (including laparoscopic total hysterectomy and laparoscopically assisted vaginal hysterectomy) for endometrial cancer

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Laparoscopic hysterectomy (236887006)

Total laparoscopic hysterectomy (236888001)

Laparoscopic-assisted vaginal hysterectomy (75835007)

Laparoscopy assisted vaginal hysterectomy with bilateral salpingo-oophorectomy (441820006)

OPCS-4 code(s):

Laparoscopic hysterectomy (LH):

   Q07.4 Total abdominal hysterectomy NEC

   Includes: Hysterectomy NEC

 Y75.2 Laparoscopic approach to abdominal cavity NEC

   Note: If the clinical record is more specific, then another code may be appropriate from category **Q07.-** with the addition of **Y75.2**

Laparoscopic Vaginal Hysterectomy (LVH):

   Q08.9 Unspecified vaginal excision of uterus

   Includes: Vaginal hysterectomy NEC

   Y75.2 Laparoscopic approach to abdominal cavity NEC

   Note: If the clinical record is more specific, then another code may be appropriate from category **Q08.-** with the addition of **Y75.2**

Laparoscopically Assisted Vaginal Hysterectomy (LAVH):

Q08.9 Unspecified vaginal excision of uterus

Includes: Vaginal hysterectomy NEC

Y75.1 Laparoscopically assisted approach to abdominal cavity

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Endometrial carcinoma (254878006)

ICD-10 code(s):

C54.1Malignant neoplasm of endometrium

 Or

C79.8 Secondary malignant neoplasm of other specified site

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see UK Terminology Centre — NHS Digital.

The Clinical Classifications Service of the Health and Social Care Information Centre is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. Clinical Classifications Service — NHS Digital.
