

## **HTG265 - Endoscopic radical inguinal lymphadenectomy**

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### **Procedure and device:**

#### **SNOMED CT preferred term (concept ID)**

Endoscopic radical excision of inguinal lymph nodes (839091000000107)

#### **OPCS-4 code(s):**

**T85.5 Block dissection of inguinal lymph nodes**  
or

**T87.7 Excision or biopsy of inguinal lymph node**

**Y76.3 Endoscopic approach to other body cavity**  
or

**Y76.5 Robotic assisted minimal access approach to other body cavity**

If resection of the saphenous vein is required the following codes are included:

**L93.1 Excision of vein NEC**

**Y76.3 Endoscopic approach to other body cavity**  
or

**Y76.5 Robotic assisted minimal access approach to other body cavity**

A site code is also selected:

**Z98.5 Long saphenous vein**

**Z98.6 Short saphenous vein**

**Z39.5 Saphenous vein NEC**

**Note:** A laterality code is also added: either **Z94.1 Bilateral operation** or **Z94.2 Right sided operation** or **Z94.3 Left sided operation**

### **Diagnosis or health condition:**

#### **SNOMED CT preferred term (concept ID)**

Malignant tumour of penis	(363516004)
Malignant tumour of vulva	(363367000)
Malignant tumour of anus	(363490009)
Malignant melanoma of lower limb	(269581007)

**ICD-10 code(s):**

## Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [UK Terminology Centre — NHS Digital](#).

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. [Clinical Classifications Service — NHS Digital](#).
