

HTG309 Peripheral nerve-field stimulation for chronic low back pain

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release.
[SNOMED CT Submission Portal request](#) reference number xxxx.

OPCS-4 code(s):

Stage 1:

A70.4 Insertion of neurostimulator adjacent to peripheral nerve
Y70.5 Temporary operations

Y70.3 First stage of staged operations NOC

Y53.- Approach to organ under image control

Or

Y68 Other approach to organ under image control (*if image control has been used*)

Z92.5 Back NEC

Stage 2:

A70.1 Implantation of peripheral nerve neurostimulator
Y71.1 Subsequent stage of staged operations NOC

Y53.- Approach to organ under image control

Or

Y68 Other approach to organ under image control (*if image control has been used*)

Z92.5 Back NEC

Note: Codes in category **Y53 Approach to organ under image control** and **Y68 Other approach to organ under image control** are used as additional codes for any procedure that uses image control that may or may not be performed via percutaneous approach.

When a procedure has been performed using image control and the code that

classifies the procedure **does not** state the type of image control used, then a code from these categories **must be** assigned. If the specific method of image control is not stated, the fourth-character **.9** must be assigned.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release.

[SNOMED CT Submission Portal request](#) reference number xxxxx.

ICD-10 code(s):

M54.5 Low back pain

(Fifth character site code before M40 can be assigned where information is available)

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
