

## **HTG371 - Implantation of a duodenal–jejunal bypass liner for managing type 2 diabetes**

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

**Procedure:**

**OPCS-4 code(s):**

**G64.3 Endoscopic insertion of tubal prosthesis into jejunum**

**Y70.5 Temporary operations**

**Diagnosis or health condition:**

**ICD-10 code(s):**

**E11.- Type 2 diabetes mellitus**

## **Clinical coding recommendations for NICE guidance**

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
