

HTG419 Single-incision sub-urethral short tape insertion for stress urinary incontinence in women

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

M57.1 Introduction of vaginal tape NEC

Plus one of the following codes if the type of mesh tape is known:

Y28.1 Insertion of synthetic mesh into organ NOC

Or

Y28.2 Insertion of biological mesh into organ NOC

Or

Y28.3 Insertion of composite mesh into organ NOC

Note: Code **M45.9 Unspecified diagnostic endoscopic examination of bladder** would also be recorded if a cystoscopy was also performed.

Diagnosis or health condition:

ICD-10 code(s):

N39.3 Stress incontinence

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
