IP268/3 Infracoccygeal sacropexy using mesh to repair vaginal vault prolapse

Consultation Comments table

IPAC date: 9 March 2017

Com. no.	Consultee name and organisation	Sec. no.	Comments	Response
				Please respond to all comments
1	Consultee 1 NHS Clinician	1.1	I think that the restrictions on this procedure are probably a little harsh (although I agree with the recommendations for uterine prolapse using the same type of procedure). I think that there is probably sufficient data (as you have presented) to allow this operation to be performed without needing to go through governance committees at an individuals hospital. The presented data suggests good results	Thank you for your comment. The Committee considered this comment but decided not to change the guidance.
2	Consultee 1 NHS Clinician	1.3, 1.4	I agree with the other issues regarding registering with a database and only being done by appropriately trained surgeons etc.	Thank you for your comment. Consultee agrees with sections 1.3 and 1.4 of the guidance.

"Comments received in the course of consultations carried out by NICE are published in the interests of openness and transparency, and to promote understanding of how recommendations are developed. The comments are published as a record of the submissions that NICE has received, and are not endorsed by NICE, its officers or advisory committees."
