HTG463 Mosaicplasty for symptomatic articular cartilage defects of the knee

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Endoscopic osteochondral autograft (425721004)

Open grafting of osteochondral autograft to knee (438763005)

OPCS-4 code(s):

Open Procedure:

   W35.4 Therapeutic drilling of bone NEC

   Z84.6 Knee joint

   Z94.- Laterality of operation

   W31.8 Other specified other autograft of bone

   Z84.6 Knee joint

   Z94.- Laterality of operation

   Y67.8 Other specified harvest of other multiple tissues

   plus site of harvest

   Z94.- Laterality of operation

Endoscopic procedure:

   W83.7 Endoscopic osteochondral autograft

   Z84.6 Knee joint

   Z94.- Laterality of operation

   Y67.8 Other specified harvest of other multiple tissues

   plus site of harvest

   Z94.- Laterality of operation

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Articular cartilage disorder of knee (429632003)

ICD-10 code(s):

   M24.1 Other articular cartilage disorders

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see UK Terminology Centre — NHS Digital.

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided. Clinical Classifications Service — NHS Digital.
