Coding recommendations

K35.5 Percutaneous transluminal valvuloplasty

Includes: Percutaneous transluminal balloon valvuloplasty

Y53.- Approach to organ under image control

Z32.2 Aortic valve

Note: Codes within category Y53.- are used as secondary codes to classify interventions that are percutaneous and require some form of image control: if the method of image control is unspecified, Y53.9 Unspecified approach to organ under image control is assigned.
