

HTG560 Balloon cryoablation for Barretts oesophagus or squamous dysplasia of the oesophagus

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

A request for a new SNOMED CT code has been submitted for the next release.

[SNOMED CT Submission Portal request](#) reference number 28344.

OPCS-4 code(s):

The following OPCS-4.8 code combinations classify balloon cryoablation of the oesophagus depending on type of endoscope used:

G14.5 Fibreoptic endoscopic destruction of lesion of oesophagus NEC

Y13.2 Cryotherapy to lesion of organ NOC

Note: When this procedure is associated with a general fibreoptic endoscopic examination of upper gastrointestinal tract the following OPCS-4.8 codes are assigned:

G43.5 Fibreoptic endoscopic destruction of lesion of upper gastrointestinal tract NEC

Y13.2 Cryotherapy to lesion of organ NOC

Z27.1 Oesophagus

Or

G17.8 Other specified endoscopic extirpation of lesion of oesophagus using rigid oesophagoscope

Y13.2 Cryotherapy to lesion of organ NOC

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Barrett's oesophagus (302914006)

Esophageal dysplasia (308857008)

ICD-10 code(s):

K22.7 Barrett oesophagus

Note: Current national clinical coding standard **DCS.XI.2 Barrett oesophagus with or without low or high grade dysplasia (K22.7)** states Barrett oesophagus with or without low or high grade dysplasia is classified at **K22.7**.

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
