

## **HTG576 Repetitive short pulse transscleral cyclophotocoagulation for glaucoma**

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### **Procedure and device:**

#### **SNOMED CT preferred term (concept ID)**

A request for a new SNOMED CT code has been submitted for the next release. SNOMED CT Submission Portal request reference number 32353.

#### **OPCS-4 code(s):**

**C66.4 Laser photocoagulation of ciliary body**

**Z94.- Laterality of operation**

**Note:** Code **Y76.9 Unspecified minimal access to other body cavity** must be assigned following **C66.4** if the procedure is documented as a MIGS procedure in line with clinical coding standard PChSC1: Minimally invasive glaucoma surgery (MIGS).

### **Diagnosis or health condition:**

#### **SNOMED CT preferred term (concept ID)**

Glaucoma (23986001)

#### **ICD-10 code(s):**

**H40.- Glaucoma**

Or

**H42\*.- Glaucoma in diseases classified elsewhere**

Or

**H44.5 Degenerated conditions of globe**

*Includes but not limited to absolute glaucoma*

## **Clinical coding recommendations for NICE guidance**

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of NHS Digital. For further information including licensing, see [here](#).

The Clinical Classifications Service of NHS Digital is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided.
