

HTG579 Permanent His-bundle pacemaker implantation for treatment of heart failure

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

K60.1 Implantation of intravenous cardiac pacemaker system NEC

Plus

Y53.- Approach to organ under imaging control

Diagnosis or health condition:

ICD-10 code(s):

I50.- Heart failure

Note: Due to the structure of ICD-10, certain types of heart failure are excluded from category **I50.- Heart failure**. Therefore, this category may not be appropriate to all situations as code selection may be influenced by additional information documented within the patient medical record.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of, ICD-10 and OPCS-4. Further Classifications information, see [here](#).
