

HTG604 Endobronchial nerve ablation for chronic obstructive pulmonary disease

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

A60.4 Radiofrequency controlled thermal destruction of peripheral nerve

Y76.3 Endoscopic approach to other body cavity

Z04.4 Vagus nerve (x)

Diagnosis or health condition:

ICD-10 code(s):

J44.- Other chronic obstructive pulmonary disease

Chronic obstructive pulmonary disease (COPD) is quite a broad term and it is possible that there are ICD-10 codes outside of this range that classify conditions considered to be types of 'COPD'. Therefore, final ICD-10 code assignment may differ depending on the specific diagnosis documented within the patient record.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
