

# Endoscopic full thickness removal of gastrointestinal stromal tumours of the stomach

Information for the public  
Published: 2 March 2022

[www.nice.org.uk](http://www.nice.org.uk)

This procedure can only be done as part of a research study. This is because there is not enough evidence to be sure how well it works or how safe it is.

Your healthcare professional should talk to you about the research.

Gastrointestinal stromal tumours are a type of cancer that can develop in the wall of the digestive tract, usually in the stomach or small bowel.

In this procedure, an endoscope (a thin, flexible tube with a camera on the end) is inserted through the mouth into the stomach. The tumour is pulled up into the tube using forceps (tongs). A clip is released and placed over the tumour. The tumour and some surrounding tissue (full thickness) is cut out, and the clip is left in place to close the hole in the stomach.

The aim is to remove the tumour without the need for open surgery.

The [NHS website](#) may have information on your condition and treatment options.

## Is this procedure right for me?

You should be included in [making decisions about your care](#).

Your healthcare professionals should explain the risks and benefits of this procedure and how it is done. They should discuss your options and listen carefully to your views and concerns. They should offer you more information about the procedure. Your family or carers can be involved if you want or need them to be.

You will be asked to decide whether you agree (consent) to have the procedure. Find out more about [giving consent to treatment on the NHS website](#).

## Some questions to think about

- How many appointments will I need?
- What are the possible benefits? How likely am I to get them?
- What are the risks or side effects? How likely are they?
- Will I have to stay in hospital?
- What happens if it does not work or something goes wrong?
- What happens if I do not want the procedure?
- Are other treatments available?

## More information

- [NICE's information on HealthTech guidance](#) explains what HealthTech is and how we assess it.
- [NICE's information on HealthTech recommendations](#) explains what only in research means.
