

HTG633 Bioresorbable stent implantation for treating coronary artery disease

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Using drug eluting stent

K75.1 Percutaneous transluminal balloon angioplasty and insertion of 1-2 drug-eluting stents into coronary artery

Y14.6 Insertion of biodegradable stent into organ NOC

Plus one of the following 'approach' codes if the artery is specified

Y79.3 Transluminal approach to organ through femoral artery

Or

Y79.5 Transluminal approach to organ through radial artery

Plus

Y53.4 Approach to organ under fluoroscopic control

Using non drug eluting stent

K75.3 Percutaneous transluminal balloon angioplasty and insertion of 1-2 stents into coronary artery

Y14.6 Insertion of biodegradable stent into organ NOC

Plus one of the following 'approach' codes, if the artery is specified

Y79.3 Transluminal approach to organ through femoral artery)

Or

Y79.5 Transluminal approach to organ through radial artery (if specified)

Plus

Y53.4 Approach to organ under fluoroscopic control

Diagnosis or health condition:

ICD-10 code(s):

I25.1 Atherosclerotic heart disease

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
