

# **HTG679 Intramuscular diaphragm stimulation for ventilator-dependent chronic respiratory failure caused by high spinal cord injuries**

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

## **Procedure:**

### **OPCS-4 code(s):**

**A70.1 Implantation of peripheral nerve neurostimulator**  
**Y75.2 Laparoscopic approach to abdominal cavity NEC**  
**Z53.1 Diaphragm**

## **Diagnosis or health condition:**

### **ICD-10 code(s):**

**J96.1 Chronic respiratory failure**

**Note:** A fifth character must be assigned with **J96.1** to indicate the type of chronic respiratory failure , i.e. 0 Type I, 1 Type II or 9 Unspecified type.

**T91.3 Sequelae of injury of spinal cord**

**Z99.1 Dependence on respirator**

**Note:** A code classifying the subsequent neurological disease/disorder caused by the injury would also be assigned.

## **Clinical coding recommendations for NICE guidance**

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4.

Further Classifications information, see [here](#).
