

HTG68 – Endoscopic dacryocystorhinostomy

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Intranasal dacryocystorhinostomy (231630003)

OPCS-4 code(s):

C25.3 Dacryocystorhinostomy and insertion of tube HFQ
Y76.6 Endonasal endoscopic approach to other body cavity

or

C25.4 Dacryocystorhinostomy NEC
Y76.6 Endonasal endoscopic approach to other body cavity

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

Obstruction of nasolacrimal duct (314022009)

ICD-10 code(s):

Q10.5 Congenital stenosis and stricture of lacrimal duct

Or

H04.5 Stenosis and insufficiency of lacrimal passages

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with NHS Digital to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate SNOMED CT, OPCS-4 and ICD codes are provided.

NHS Digital is the national release centre for the UK edition of SNOMED CT, ICD and OPCS-4. Further SNOMED CT information including licensing, see [here](#). Further Classifications information, see [here](#).
