

HTG684 Minimally invasive fusionless deformity correction surgery to treat adolescent idiopathic scoliosis

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

V41.5 Posterior attachment of spinal growing system
V55.- Levels of spine

Diagnosis or health condition:

ICD-10 code(s):

M41.1 Juvenile idiopathic scoliosis

Note: An additional 5th character code can be assigned to **M41.1** to indicate the specific site of involvement.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4.

Further Classifications information, see [here](#).
