

HTG699 Vaginal natural orifice transluminal endoscopic surgery for hysterectomy and adnexal surgery

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Q08 Vaginal excision of uterus

Y75.9 Unspecified minimal access to abdominal cavity

Includes 'Minimally invasive approach to abdominal cavity NEC'

Note: Code assignment for the adnexal surgery will depend on the specific procedure(s) performed; codes to classify adnexal surgery must be followed by **Y75.9**.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4.

Further Classifications information, see [here](#).
