
HTG707- Intravascular lithotripsy for calcified arteries in peripheral arterial disease

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

The following code would be assigned in secondary position to a code(s) from Chapter L Arteries and veins, classifying the specific procedure on the specific artery:

Y17.3 Lithotripsy of lesion of organ NOC

Diagnosis or health condition:

ICD-10 code(s):

I73.8 Other specified peripheral vascular diseases

I73.9 Peripheral vascular disease, unspecified

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
