

HTG725 Phrenic nerve pacing for congenital central hypoventilation syndrome

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Temporary

A70.4 Insertion of neurostimulator electrodes adjacent to peripheral nerve

Y70.5 Temporary operations

Z94.- laterality of operation

Permanent

A70.1 Implantation of peripheral nerve neurostimulator

Z94.- laterality of operation

Diagnosis or health condition:

ICD-10 code(s):

G47.3 Sleep apnoea

Research indicates that congenital central hypoventilation is synonymous with Ondine's curse and is a type of severe form of sleep apnoea.

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4.

For further Classifications information, see [here](#).
