

HTG727 Phrenic nerve pacing for ventilator-dependent high cervical spinal cord injury

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

Temporary

A70.4 Insertion of neurostimulator electrodes adjacent to peripheral nerve

Y70.5 Temporary operations

Z94.- laterality of operation

Permanent

A70.1 Implantation of peripheral nerve neurostimulator

Z94.- laterality of operation

Diagnosis or health condition:

ICD-10 code(s):

S14.1 Other and unspecified injuries of cervical spinal cord

Or

T06.0 Injuries of brain and cranial nerves with injuries of nerves and spinal cord at neck level

Plus

Z99.1 Dependence on respirator

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
