

## HTG733 Unilateral MRI-guided focused ultrasound thalamotomy for moderate-to-severe tremor in Parkinson's disease

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

### **Procedure:**

#### **OPCS-4 code(s):**

**A03.2 Stereotactic ablation of tissue of thalamus**

**Y11.5 Ultrasonic destruction of organ NOC**

**Y53.7 Approach to organ under magnetic resonance imaging control**

### **Diagnosis or health condition:**

#### **ICD-10 code(s):**

**G20 Parkinson disease**

Or

**G21 Secondary parkinsonism**

Or

**A52.1† Symptomatic neurosyphilis**

**G22\* Parkinsonism in diseases classified elsewhere**

---

## **Clinical coding recommendations for NICE guidance**

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
