

HTG740 Intravascular lithotripsy for calcified coronary arteries during percutaneous coronary intervention

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

One of the following codes would be assigned in secondary position to the code(s) to classify the percutaneous coronary intervention

Y17.3 Lithotripsy of lesion of organ NOC

Or

Y17.6 Electrohydraulic lithotripsy of lesion of organ NOC

Diagnosis or health condition:

ICD-10 code(s):

I25.1 Atherosclerotic heart disease

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
