Daniel David George Chappell	Specialist Committee Member	Financial Interests	Speaker fees for UCB Pharma	08/10/2024	03/12/2024	08/10/2024	
			Speaker fees for UCB Pharma Declaring and participate (remove for part 2 discussion) Potential conflict spoken to Daniel during meeting via zoom. His conflicts have been misinterpreted. It was not related to osteoporosis drugs. It was an educational talk on the osteo care pathway that mentioned all meds for treatment. It wasn't an ad board or promotional talk on a drug. His real-world experience is relevant so he should be reinstated in part 2 Chair confirmed on this information at 12.24	30/10/2024	03/12/2024	30/10/2024	Declaring and participate Potential conflict

Robert Milner	Professional Expert	Financial Interests	I am not entirely sure this is a financial interest but will declare it regardless in the interests of transparency. I do paid work for Radiology outsourcing companies in my spare time. When an NHS Trust has a backlog of x-rays, they outsource the x-rays to a third party company. That company sends the images to me and I report them (write the radiology report) for a fixed fee.	Since approximately 2012/13	11/02/2025	Ongoing	Participate

		Non-financial professional and personal interests	<p>I am employed by Open Medical, a digital health company primarily operating in the UK, with the NHS as our main client. One of our products is a workflow management system designed specifically for Fracture Liaison Services (FLS), facilitating the identification of cases from Emergency Departments and directing them to FLS services.</p> <p>While Open Medical does not currently develop AI tools related to this project, we have been approached by several clients and AI companies interested in integrating such tools into our platform. These discussions have been informal, with no formal commercial or research engagements to date. However, given the commercial interest in FLS services and the success of our existing platform, it is likely that Open Medical will establish a partnership in this space within the next year.</p> <p>Any pathway development undertaken by Open Medical will remain provider-agnostic, ensuring that different AI providers can integrate and interact with the system.</p>	15/02/2025	27/02/2025	Ongoing	Declare and participate
