

HTG770 Leadless cardiac pacemaker implantation for bradyarrhythmias

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

K60.5 Implantation of intravenous single chamber cardiac pacemaker system

Or

K60.6 Implantation of intravenous dual chamber cardiac pacemaker system

Plus

Y53.4 Approach to organ under fluoroscopic control

Plus

K58.5 Transluminal intracardiac echocardiography (If used)

Diagnosis or health condition:

ICD-10 code(s):

I49.- Other cardiac arrhythmias

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information see [NHS England Digital Clinical Classifications](#).
