## INTERVENTIONAL PROCEDURES PROGRAMME

### Equality impact assessment

#### HTG772 Off-pump minimal access mitral valve repair by artificial chordae insertion to treat mitral regurgitation

The impact on equality has been assessed during guidance development according to the principles of the NICE Equality scheme.

#### Briefing

1. Have any potential equality issues been identified during the briefing process (development of the brief or discussion at the committee meeting), and, if so, what are they?

Age: The prevalence of mitral regurgitation increases with age.

Disability: People with degenerative mitral valve disease may be considered disabled under the Equality Act 2010 if their condition has a substantial adverse impact on normal day to day activities for longer than 12 months.

Sex: The prevalence of valvular disease is similar in men and women.

2. What is the preliminary view as to what extent these potential equality issues need addressing by the committee? (If there are exclusions listed in the brief (for example, populations, treatments or settings), are these justified?)

This was not thought to have an impact on the assessment of the procedure. No exclusions were applied.

3. Has any change to the brief (such as additional issues raised during the committee meeting) been agreed to highlight potential equality issues?
No

4. Have any additional stakeholders related to potential equality issues been identified during the committee meeting, and, if so, have changes to the stakeholder list been made?
No

**Consultation**

1. Have the potential equality issues identified during the briefing process been addressed by the committee, and, if so, how?
No specific data relating to age, disability or sex was identified in the literature presented in the overview.

2. Have any other potential equality issues been raised in the overview, specialist adviser questionnaires or patient commentary, and, if so, how has the committee addressed these?
No

3. Have any other potential equality issues been identified by the committee, and, if so, how has the committee addressed these?
No

4. Do the preliminary recommendations make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?
No

5. Is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?
No

6. Are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 4 or 5, or otherwise fulfil NICE's obligation to promote equality?
No

7. Have the committee's considerations of equality issues been described in the consultation document, and, if so, where?
Yes, in the 'equality considerations' sections 3.15, 3.16, 3.17 and 3.18.

## Final interventional procedures document

1. Have any additional potential equality issues been raised during the consultation, and, if so, how has the committee addressed these?

Open-heart surgery and other mitral valve procedures may not be suitable for people who are older, frail, or have multiple or complex comorbidities. This procedure provides a treatment option for this group.

2. If the recommendations have changed after consultation, are there any recommendations that make it more difficult in practice for a specific group to access a technology or intervention compared with other groups? If so, what are the barriers to, or difficulties with, access for the specific group?

Not applicable.

3. If the recommendations have changed after consultation, is there potential for the preliminary recommendations to have an adverse impact on people with disabilities because of something that is a consequence of the disability?

Not applicable.

4. If the recommendations have changed after consultation, are there any recommendations or explanations that the committee could make to remove or alleviate barriers to, or difficulties with, access identified in questions 2 and 3, or otherwise fulfil NICE's obligations to promote equality?

Not applicable.

5. Have the committee's considerations of equality issues been described in the final interventional procedures document, and, if so, where?

Yes, in the 'equality considerations' sections 3.15, 3.16, 3.17 and 3.18.
