

HTG772 - Insertion of neo - chordae into the beating heart for mitral regurgitation

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

K38.2 Operations on chordae tendineae
Y49.4 Transapical approach to heart
Y02.1 Implantation of prosthesis into organ NOC
Z32.1 Mitral valve
U20.2 Transoesophageal echocardiography
Y97.- Radiology with contrast (*either Y97.1 Radiology with pre and post contrast or Y97.3 Radiology with post contrast if performed with contrast*)
Y98.- Radiology procedures (*4th character dependent on duration of scan*)

Diagnosis or health condition:

ICD-10 code(s):

I34.0 Mitral (valve) insufficiency
Or
I02.0 Rheumatic chorea with heart involvement
Or
I05.1 Rheumatic mitral insufficiency
Or
I05.2 Mitral stenosis with insufficiency
Or
I08.0 Disorders of both mitral and aortic valves
Or
I08.1 Disorders of both mitral and tricuspid valves
Or
I08.3 Combined disorders of mitral, aortic and tricuspid valves
Or
Q23.3 Congenital mitral insufficiency

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS Digital to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS Digital Information Representation Services work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS Digital is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see [here](#).
