HTG98 - Foker technique for long-gap oesophageal atresia

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure:

OPCS-4 code(s):

G07.3 Correction of congenital atresia of oesophagus

Note: **Y70.3 First stage of staged operations NOC** or **Y71.1 Subsequent stage of staged operations NOC** may be added to indicate the stage of the procedure.

Diagnosis or health condition:

ICD-10 code(s):

Q39.0 Atresia of oesophagus without fistula

Or

Q39.1 Atresia of oesophagus with tracheo-oesophageal fistula

Clinical coding recommendations for NICE guidance

For each published interventional procedure guidance, we work with NHS England to provide relevant clinical coding information.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

NICE and NHS England Terminology and Classifications Delivery Service work collaboratively to ensure the most appropriate OPCS-4 and ICD-10 codes are provided.

NHS England is the national release centre for the UK edition of ICD-10 and OPCS-4. Further Classifications information, see here.
