

IPG012 – Percutaneous vertebroplasty

SNOMED CT provides clinical terms for entry into the patient record to record clinical information relevant to that encounter; the mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

Procedure and device:

SNOMED CT preferred term (concept ID)

Fluoroscopic vertebroplasty (431911003)

OPCS-4 code(s):

V44.4 Vertebroplasty of fracture of spine

V55.- Levels of spine

Y53.- Approach to organ under image control

Site code

Note: Codes within category **V55.-** are assigned in second place each time a spinal operation is coded. If the levels of spine are not specified **V55.9 Unspecified levels of spine** is used.

Note: Codes within category **Y53.-** are used as secondary codes to classify interventions that are percutaneous and require some form of image control, if the method of image control is unspecified **Y53.9 Unspecified approach to organ under image control** is assigned.

Diagnosis or health condition:

SNOMED CT preferred term (concept ID)

ICD-10 code(s):

Clinical coding recommendations for NICE guidance

For each published interventional procedure and medical technologies guidance, we work with the Health and Social Care Information Centre (HSCIC) to provide relevant clinical coding information.

SNOMED CT provides clinical terms for entry into the patient record to store clinical information relevant to that encounter.

The mandated classifications (OPCS-4 or ICD-10) provide a method to collect and aggregate data to allow accurate and consistent data analysis.

The UK Edition of SNOMED CT is managed by the Clinical Terminology Service of the Health and Social Care Information Centre. For further information including licensing, see [UK Terminology Centre — Health and Social Care Information Centre](#)

The Clinical Classifications Service of the Health and Social Care Information Centre is the central definitive source for clinical coding guidance and determines the coding standards associated with the classifications (OPCS-4 and ICD-10) to be used across the NHS. The Clinical Classifications Service and NICE work collaboratively to ensure the most appropriate classification codes are provided.
